Insert Content

Snippets content is stored in Sharepoint 365. Separate libraries are configured to enable different levels of access and contribution. Global libraries are used to provide firm level, vetted and accurate business clauses.

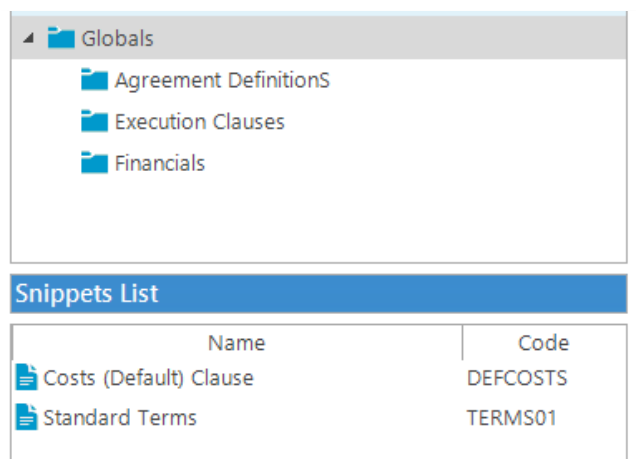

Dynamic Search

Snippets utilises Sharepoint's fast and efficient indexing services to always return accurate search results. Search by clause code, clause name, comments or full text data to quickly find required content.

Protect Content

Global libraries are used to provide firm level, vetted and accurate business clauses. Sharepoint's security model allows easy control over who can maintain and contribute to content.

Contribute and Share

Subsidise firm wide clauses with additional favoured content. Store them as personal or share them with your team.
